---

PROFESSIONAL SUMMARY:

- 15+ years of overall experience in the IT industry, specializing in DevOps and infrastructure automation using various tools and cloud services such as **AWS** and **Azure**.
- Deployed and managed cloud infrastructure on **AWS** and Microsoft **Azure**, including the implementation of **Infrastructure as Code** (**IaaC**) practices with **Terraform** and **Ansible**.
- Created and optimized **CI/CD** pipelines and workflows using **Jenkins** and **Azure** Devops to ensure smooth and reliable deployment processes.
- Experience with the **Blue/Green** deployment strategy using **Terraform** and **AWS Elastic Load Balancing** and Amazon **Route 53** for traffic routing and failover.
- Hands-on experience in developing **Ansible** playbooks for automating application deployment and configuration management.
- Good experience in setting up **EKS** clusters for running microservices and deploying them into production on a **Kubernetes**-backed infrastructure.
- Provided comprehensive support for **EKS** clusters, maintaining **Kubernetes** setups and troubleshooting issues such as ImagePullBackOff, CrashLoopBackOff, and pod scheduling failures.
- Familiar with **Prometheus** and **Grafana** for monitoring and visualizing system performance.
- Strong experience in containerization of microservices architecture applications using **Docker**.
- Experience using **Splunk** for log analysis and server performance optimization.
- Experience working with operating systems such as Windows and Linux.

TECHNICAL SKILL SET:

- Operating Systems : Linux, Windows
- Version Control : GIT
- Cloud Technology : Azure, AWS
- IAC tools : Terraform, Ansible
- Containerization tools : Docker, AKS
- CI Tools : Jenkins, Azure Devops
- Languages/Scripting : Shell Script
- Application/Web Server : Tomcat, JBoss, WebLogic, Apache
- Build Tools : Maven
- Repository Management : Nexus, Artifactory
- Monitoring tools : Dynatrace, Splunk

Employment History:

- Worked as Tech Lead at Fiserv from 11th April, 2018 to 26th Mar, 2026
- Worked as Senior System Analyst at TCS from December 20, 2017 to April 10, 2018
- Worked as System Analyst at Tech Mahindra from January 2017 to 13th October 2017
- Worked as at Amazon Development Centre from September 2013 - July 2016
- Worked as Team Developer at BA Continumm Solutions Pvt Ltd from Aug 2009 - Aug 2013

ROLES & RESPONSIBILITIES: -

Infrastructure as Code (IaC) & Automation:

- Designed, deployed, and managed **AWS** & **Azure** cloud infrastructure using **Terraform**.
- Automated infrastructure provisioning, configuration, and deployments with **Ansible** playbooks.

- Performed monthly deployments using **Blue/Green** deployment strategy on Amazon Web Services to ensure zero downtime and seamless releases.
- Developed shell scripts to automate infrastructure tasks.

CI/CD & Deployment Automation:

- Built and maintained **CI/CD** pipelines in **Jenkins**.
- Implemented **Blue/Green** deployment strategies.
- Created **Docker** images and managed deployments.

Cloud Infrastructure & Security:

- Managed **Azure** services including Virtual Machines, Load Balancer, Storage Accounts, and Monitoring.
- Configured SSL certificates and security rules.

Monitoring & Logging:

- Implemented monitoring using **Splunk**, **Dynatrace**, **Prometheus** and **Grafana**.
- Designed disaster recovery strategies.
